

FleetSpark — Investor Pitch Deck

Version: 1.0

Date: June 11, 2026

Prepared by: SyncSphere LLC

Purpose: Investor pitch — EV Fleet Management Platform for Africa

Slide 1: Title

FleetSpark

The Operating System for Electric Mobility in Africa

Fleet Management · Financing · Insurance · Charging · Banking

Founded: 2026 · Kampala, Uganda

Contact: admin@syncspherellc.com | +1 (432) 692-0996

Slide 2: The Problem

Africa's \$12B Mobility Crisis

Uganda alone: - 700,000+ **boda bodas** (motorcycle taxis) — primary transport for 80% of urban commuters - **\$795M/year** spent on vehicle fuel imports (2nd highest import category) - **Kampala** = 5th most polluted city in Africa - **Zero** integrated software for EV fleet operators - **Zero** consumer protection for bike financing (riders exploited) - **Zero** real-time charging infrastructure visibility

The fragmentation: - Fleet operators use **paper + WhatsApp** to track vehicles - Bike financiers (MOGO, Watu, Tugende) use **spreadsheets** — aggressive repossession, no flexibility - Charging stations are **invisible** — riders don't know where to charge, what's available, or what it costs - Insurance is **mandatory but opaque** — riders don't understand coverage - Banks **won't lend** to riders — no proof of income despite mobile money data

Result: EV adoption is stalling. Operators can't scale. Riders are trapped. Investors see risk.

Slide 3: The Solution

FleetSpark — One Platform, Five Modules

Fleet Management (all vehicle types) - Real-time GPS tracking, battery monitoring, trip history, maintenance scheduling
- Works for buses, bikes, cars, vans — anything with a battery

Financing & Credit (bikes on installment) - Digital loan contracts, Mobile Money payments, graduated defaulter management - GPS kill switch for repossession, rider wallets, income-based scoring - **Transparent terms** — no hidden fees, no surprise repossessions

Insurance Integration - Third-party (mandatory), accident, theft, comprehensive - Premium calculator, policy management, claims processing - **Insurance-loan linkage** — payout covers outstanding loan first

Charging Infrastructure ✗ (NEW) - **Nationwide charging spot map** — all stations, real-time availability - **Battery swap tracking** — which stations have available swap batteries - **Charging payments** — pay per kWh via Mobile Money (MTN/Airtel) - **Realtime spot updates** — which chargers are in use, which are free - **Battery consumption analytics** — per vehicle, per route, per rider - **Distance estimation** — "Can I reach the next charging station?" based on current battery

Banking & Income Verification - Mobile money statement retrieval (MTN MoMo, Airtel Money API) - Income scoring engine (0-100) based on transaction patterns - **Proof of income certificates** for bank loan origination - Bank partnership API for pre-approval workflows

Slide 4: Market Opportunity

TAM → SAM → SOM

Level	Market	Value
TAM	Africa EV fleet management	\$12B by 2030
SAM	East Africa (Uganda, Kenya, Rwanda, Tanzania)	\$2.4B by 2030
SOM	Uganda EV fleet + financing + charging	\$180M by 2028

Uganda specifics: - 700,000+ boda bodas → 5% EV penetration = 35,000 e-bodas - 3,000+ electric vehicles currently, growing 40% YoY - Government target: 3,500 charging stations by 2040 - **Zero competitors** with integrated platform

Comparable markets: - **India** (Ola Electric, Yulu): \$4B+ valuation for integrated e-mobility - **Kenya** (BasiGo, Roam): \$50M+ raised for single-module solutions - **FleetSpark** = all modules combined, first-mover in Uganda

Slide 5: Business Model

Revenue Streams

Stream	Source	Pricing	Year 1 Projection
Fleet SaaS	Fleet operators	\$150-5,000/mo	\$60K
Financing SaaS	Bike financiers	\$100-500/mo + per-loan fee	\$30K
Payment Processing	Riders (MoMo)	0.5-1% per transaction	\$15K
Charging Commissions	Charging station operators	5-10% per kWh sale	\$20K
Insurance Commission	Insurance partners	10-15% of premium	\$12K
Income Certificates	Riders/Banks	UGX 10-25K each	\$8K
Bank Data Analytics	Banks	\$500-2,000/mo	\$6K

Year 1 Total: \$151K

Year 2 (with Rwanda/Kenya expansion): \$600K

Year 3: \$1.2M

Unit economics: - CAC: ~\$50 per fleet operator (direct sales) - LTV: \$3,000+ per operator (24-month retention) - Gross margin: 75% (SaaS) + 15% (transaction fees)

Slide 6: Traction & Validation

What We Have Today

- ❑ **Full platform built** — backend (Node.js + Prisma + PostgreSQL) + frontend (React + Tailwind)
- ❑ **Database schema** — 25+ tables covering all 5 modules
- ❑ **API layer** — 50+ REST endpoints + WebSocket realtime
- ❑ **Seed data** — 2 demo organizations, 12 vehicles, 12 drivers, 5 loans, 3 insurance policies
- ❑ **GitHub repo** — github.com/SyncSphere7/fleetspark
- ❑ **Documentation** — 10 professional documents (PRD, architecture, API, UI/UX, deployment, user manual, financing module, EV market research)
- ❑ **Market research** — 50+ sources on Uganda EV market, charging infrastructure, financing landscape

Validation from Market

- **Uganda's EV manufacturers** — 24+ electric buses deployed, no fleet management software
- **Zembo** — 27 swap stations, 2,000+ bikes, no integrated software platform
- **Spiro** — 1,500+ swap stations across Africa, growing 40% YoY
- **MOGO/Watu/Tugende** — \$100M+ in bike loans, all managed on spreadsheets
- **Government alignment** — National E-Mobility Strategy mandates 3,500 charging stations by 2040

Pilot Pipeline

Partner	Status	Timeline
EV Bus Manufacturer	Pilot proposal sent	Q3 2026
Zembo Bikes	In conversation	Q3 2026
Total Uganda	Charging data partnership	Q4 2026
Stanbic Bank	Banking API discussion	Q4 2026
Jubilee Insurance	Insurance integration	Q4 2026

Slide 7: Competitive Landscape

No One Has the Full Stack

Competitor	Fleet	Financing	Insurance	Charging	Banking
MOGO	☐	☐ Basic	☐	☐	☐
Watu Credit	☐	☐ Basic	☐	☐	☐
Optibus	☐ Buses only	☐	☐	☐	☐
Geotab	☐ Expensive	☐	☐	☐	☐
Lendsqr	☐	☐ Lending only	☐	☐	☐
ChargePoint	☐	☐	☐	☐ Charging only	☐
FleetSpark	☐	☐	☐	☐	☐

Our moat: First-mover advantage in integrated EV platform for Africa. Every competitor solves ONE problem. We solve FIVE.

Slide 8: Go-to-Market Strategy

Phase 1: Uganda (Year 1)

- **Anchor clients:** 2-3 bus fleet operators + 1 bike financier
- **Charging partnerships:** Integrate all 27 Zembo stations + Total Uganda stations + Makerere University fast charger
- **Insurance partnerships:** Jubilee + APA (cover 30% of market)
- **Banking partnerships:** Stanbic + DFCU (cover 40% of bank lending)

Phase 2: East Africa (Year 2)

- **Kenya:** Largest regional EV market (BasiGo, Roam already active)
- **Rwanda:** Strongest EV policy in Africa (tax exemptions, ICE restrictions)
- **Tanzania:** 10,000+ electric two-wheelers deployed

Phase 3: Pan-Africa (Year 3)

- **Nigeria:** Largest motorcycle market in Africa (10M+ bikes)
- **Ghana:** Growing EV adoption, government incentives
- **Senegal:** Emerging e-mobility hub

Distribution

- Direct sales to fleet operators (B2B)
 - Partnerships with EV manufacturers (Spiro, Zembo, local assemblers)
 - Government partnerships (KCCA, Ministry of Energy)
 - Bank partnerships for rider acquisition
-

Slide 9: Team

SyncSphere LLC

Founded: 2026

Headquarters: United States (operating in Uganda)

Team: Full-stack development team with deep domain expertise in East African mobility, fintech, and energy sectors.
Founder: Cliff.

Why us: - Deep understanding of Uganda/East Africa market - Existing relationships with EV manufacturers, charging networks, and financial institutions - Full-stack development capability - Already built and deployed SaaS products (AfriNova, Affiluxe, SynqSocial) - Understanding of Mobile Money ecosystem (MTN, Airtel) - Knowledge of regulatory landscape (IRA, BoU, KCCA)

Advisors needed: - EV industry expert (Africa) - Former banking executive (East Africa) - Charging infrastructure specialist

Slide 10: The Ask

Seeking: \$500K Seed Round

Use of funds:

Category	Amount	%
Engineering (2 senior devs, 12 months)	\$200K	40%
Sales & partnerships	\$100K	20%
Infrastructure (servers, APIs, MoMo integration)	\$75K	15%
Insurance & banking API integrations	\$50K	10%
Legal & compliance	\$40K	8%
Operations & marketing	\$35K	7%

Milestones with this round: - ☐ Launch MVP (Q3 2026) - ☐ 3 paying fleet operators (Q4 2026) - ☐ 1 bike financier on financing module (Q4 2026) - ☐ 50 charging stations on the platform (Q1 2027) - ☐ 1 bank partnership live (Q1 2027) - ☐ Expand to Kenya (Q2 2027)

Target raise: \$500K

Valuation: \$3M pre-money

Instrument: SAFE (Simple Agreement for Future Equity)

Appendix: Key Metrics to Track

Metric	Target (Year 1)
Fleet operators on platform	5
Vehicles tracked	500
Bike loans managed	1,000
Charging stations mapped	50
Insurance policies sold	500
Income certificates generated	200
Monthly recurring revenue	\$12K
Gross margin	70%
